We have no report other than the results. We have documentation on the laboratory methodology used by Chemours' contract laboratory. Its 1600 pages. The parts of the documentation related to the actual sampling contains PII which would have to be redacted. At this time, we don't have the horsepower to summarize it. We may have a FOIA request coming in for all of this documentation. If that happens, we'll have to do the redactions and get it posted in FOIA-On-Line.

David/Rick -- could you read the inquiry below that HQ (OW) rec'd about Chemours and see if you can prepare a draft response we can send back to HQ?

Thank you SO much.

joan

Joan,

Can you assist?

Comments: Is there a report and/or additional information about the HFPO-DA results for water supplies in the vicinity of Chemours Washington Works Facility-February 2018 table on the website that details methods/methodologies for the testing and sampling? If so, how do I get a copy?
